netis®

Easy Network, Trustable

NANO AP

A1

| 300 Mbps | USB 2.0 | Soft AP | Windows 8 Compatible with |

Nano

Features:

>Wireless N speed up to 150Mbps

>Default AP mode for free Wi-Fi sharing from your PC which is online

>Nano size, ideal for travel and home use

>Easy Installation with the AP Setup program

Brief:

The netis A1 is used to share your existing network on your computer to the other devices wirelessly. After plugging in the nano sized device into the USB port and installing the AP software on your computer, you may set up your own wi-fi network and extend the Internet to your smart phone and tablet. Just within one minute.
